

Think Silicon

Think Silicon is a new startup company focusing on Semiconductor Intellectual Property design and related services. Think Silicon is seeking for enthusiastic engineers to work in the development of next generation Vector Graphics solutions targeting mobile Phones, PDAs and Navigation Devices.

Senior Software Engineer - Computer Graphics

Job Description

As a Software Engineering for Think Silicon you will be required to provide solutions for complex Graphics Algorithms and collaborate closely with the ASIC Engineers to evaluate software/hardware trade-offs. You will work with development platforms to enable 2D drivers, cooperating closely with various team members and customers to reach successful completion of the product, including documentation and delivery.

Required Skills:

- Excellent C/C++ Skills
- Experience in firmware development
- Architectural knowledge of CPUs, GPUs and Graphics processors.
- Strong Mathematical abilities with experience in Graphics Algorithms
- Experience in OpenGL or OpenVG standards

Preferred Skills:

- Use of Unix Shell Scripting tcl/tk, perl
- Experience in WindowsCE Graphics Drivers

Ability to work:

- Pro-active and enthusiastic about technology
- in intense startup company timetables

Package:

Think Silicon offers competitive salary and the opportunity to create world-class technology.
