

Think Silicon is one of the few companies worldwide that have the expertise to develop ultra-low power, high-performance graphic IP technology for mobile/embedded devices. Think Silicon is seeking for enthusiastic engineers to join our team and accelerate the development of the next generation heterogeneous multicore GPUs targeting the Wearable and IoT market.

Linux Systems Administrator

Job Description

Your main responsibility as a System Administrator will be to manage, maintain and improve our Linux servers and appliance software platforms, perform hardware configuration and modifications, system capacity planning and management, storage management, and management of user requests for services.

Required Skills:

- Linux system expertise (Ubuntu), tools, and firewall including security management
- Deep understanding of network and system administration, network configuration and debugging
- Deep knowledge of mounting file systems using NFS is a must.
- Understanding of naming services (NIS, NIS+, LDAP) in relation to user administration for accounts and group.
- PERL and/or Python scripting.
- Build automation using shell scripts and python, or similar expertise
- This position works as part of a highly interactive team. Strong listening and communication skills are required.
- 5-7 or more years of experience as a UNIX / Linux Administrator

Preferred Skills:

- Understanding of C/C++
- Must be self-motivated and have a proven ability to work well in a cross-functional team environment
- Must be flexible and able to work in a fast paced environment
- BSCS or equivalent

Think Silicon offers:

- Competitive salary
- Great work environment
- The opportunity to create world-class technology
- Exposure to international standards bodies

Location:

The candidate will work in our offices in Patras, Greece.
